

Meet a Mentor: Michael
Biochemistry with Professional Placement

Hobbies and interests:

Passionate about music and working with young people. I also enjoy graphic design and have worked on several projects including web design.

Why I became a Peer Mentor?

I enjoy working with young people and helping other students which is what attracted me to the Peer Mentor scheme. I also like being able to influence change and see things work to the best they can, and by becoming a Senior Peer Mentor I hope to be able to guide the scheme.

What you hope to get out of the scheme?

I hope to improve my ability to listen to others and take on feedback, but also to act proactively upon this. I also want to make a difference to those coming to the university, and be able to support them so that they can not only enjoy the course and university life, but also get on track to get a good degree at the end of it!
